

AUSFLOORWORKS

Industrial Flooring

Industrial strength future-proof surfacing

Industrial Flooring is an industrial grade flooring system offering superior safety, durability and performance. Designed for industrial applications, Industrial is hard and durable, resistant to impact, abrasion, thermal shock and chemicals and food acids. It's also non-porous, hygienic and easily cleaned.

Industrial Flooring is totally impermeable, carries vehicular traffic without damage and resists the sudden impacts so prevalent in industry. It is highly resistant to acid or cleaning agents, and its unbroken surface prevents infestation or harbouring of bacteria, making it ideal for food processing and the beverage industries.

This flooring solution can be graduated from smooth to varying degrees of roughness, creating the utmost in safety footing in wet or greasy conditions.

AusFloorworks are the experts in choosing the right flooring to suit your requirements – from strength and durability, to easy maintenance, to aesthetics, or to sustainability. It is with pride and professionalism that AusFloorworks provide the best in service and advice.

Industrial strength flooring is a future-proof surface for the manufacturing industry.

Key Features:

Heavy duty

Fast and efficient application

Strength and durability

Easy maintenance

Resistant to damage

Performance Profile:

Fast curing

Resistant to thermal shock

High abrasion resistance

Zero odour

Slip resistant

Chemical resistant

Protects against acids, chemicals, oils and grease

Proven performance for over 30 years in the food industry

Hygienic and allergy free

High safety rating

Target Areas:

- ◆ Food and Beverage Industry
- ◆ Food processing plants
- ◆ Dairy, red meat industries
- ◆ Workshops
