

AUSFLOORWORKS

Terrazza Flooring

Combines beauty with functional durability

Terrazza Flooring is an elegant, decorative flooring designed to reveal a radiant and seamless surface. Terrazza Flooring is created by embedding aggregates of stone, glass, and marble, in a cement or resin base to achieve a beautifully artful and highly durable surface.

Terrazza is mixed on site, trowelled directly onto the floor and then diamond ground and polished to expose the visual texture of the aggregate.

Terrazza Flooring offers designers immense flexibility in choice of colours, effects and patterns to suit any project. As it is applied in insitu there are no grout lines and the only joints are movement joints that exist in the substrate. Terrazza features a strong resin matrix abrasion which is 4 times that of concrete. As it is completely odourless to install, this version meets Green-Star requirements.

AusFloorworks are the experts in choosing the right flooring to suit your requirements – from strength and durability, to easy maintenance, to aesthetics, or to sustainability. It is with pride and professionalism that AusFloorworks provide the best in service and advice.

Adding a sense of opulence to any space, Terrazza is the right choice for beauty and durability.

Key Features:

-  Fast and efficient application
-  Free form design
-  Vivid, full colour spectrum
-  Resistant to damage
-  Strength and durability
-  No grout lines
-  No set downs required
-  No loss of trade
-  Hygienic
-  Can be patched and repaired in situ

Performance Profile:

- Fast and efficient application
- Free form design
- Vivid, full colour spectrum
- Resistant to damage
- Strength and durability
